

# RoC Consult and Jeonnam Offshore Wind Power will execute a RoC drill on Jeonnam 1 Offshore Wind Farm

We are happy to announce that RoC Consult will be executing RoC drills on Jeonnam 1 Offshore Wind Farm.

Jeonnam 1 Offshore Wind Farm is a 99 MW offshore wind farm that will be constructed off the coast of Shinan County in the Jeonnam Province in the southwest of Korea. It is expected to be completed by the end of 2024.

Jeonnam Offshore Wind Power Co., Ltd. was founded in 2020 and it is a 51-49 joint venture between SK E&S and Copenhagen Infrastructure Partners (CIP).

Jeonnam 1 precedes Jeonnam 2 & 3 projects which are currently in the development phase. The three projects combined will have 899MW capacity.

“At RoC Consult we are excited to once again execute a RoC drill in South Korea. South Korea has set ambitious goals for transitioning to renewable energy and we are proud to play a small role.”

#### About RoC Drill:

The RoC drill is a practical method to visualize and rehearse the execution of a complex commercial project. The concept has shown to be very useful for de-risking commercial projects. By rehearsing on physical (or virtual) models/mockups, we visualize, rehearse, and stress test the plan before executing it.

Yours sincerely,

*Carsten Sølund*
